SUMMARY

Winner is a Data Analyst with hands-on experience analyzing data, building dashboards, and turning findings into insights that support business decisions. Skilled in SQL, Power BI, Excel, and data analysis, with experience identifying trends, analyzing customer behavior, and solving business problems through data. Comfortable working with complex datasets, learning new tools quickly, and communicating findings clearly to both technical and non-technical audiences.

PROJECTS

Customer Support Performance Analysis | Excel, PostgreSQL, Power BI |

[github.com/winnerdonald158/Customer Support Performance Analysis Dashboard](https://github.com/winnerdonald158/Customer-Support-Performance-Analysis-Dashboard)

- I analyzed customer support ticket data to evaluate resolution time, response time, escalations, reopen rates, CSAT, and product-level support issues.
- I identified Delivery / Shipping as the category with the highest average resolution time at 68.73 hours.
- I discovered that North America had the highest escalation rate, while Account Access recorded the highest ticket reopen rate.
- I also discovered that SecureVault had the highest proportion of Critical/High-priority tickets, with higher interaction levels requiring further investigation.
- I analyzed the relationship between first response time and CSAT to understand whether response speed was associated with customer satisfaction.
- I built a Power BI dashboard using KPIs and focused visuals to highlight service bottlenecks, escalation patterns, resolution quality, response time, and customer satisfaction.

SaaS Customer Churn Analysis | PostgreSQL, Power BI |

[github.com/winnerdonald158/SaaS Customer Churn Analysis](https://github.com/winnerdonald158/SaaS-Customer-Churn-Analysis)

- I analyzed 80K customer records to identify churn patterns across subscription plans, satisfaction, support issues, feature adoption, and login behavior.
- I identified a 1.42% overall churn rate and found Starter customers had the highest churn among subscription plans.
- I discovered that low satisfaction, frequent support issues, lower feature adoption, and infrequent logins were associated with higher churn.
- I built a Power BI dashboard to highlight churn drivers and support customer retention decisions.

E-Commerce Customer Behavior Analysis | Excel, SQL & Power BI

github.com/winnerdonald158/ecommerce-customer-analysis

- I cleaned this ecommerce customer behavior dataset of 250,000 + transactions across 49,673 customers
- I also analyzed this dataset to identify revenue drivers, customer churn patterns, and segmentation opportunities.
- I Identified 13,584 at-risk customers (27.3% churn rate) and developed targeted win-back strategy
- prioritizing high-value inactive customers
- I built Power BI dashboards to visualize trends and support better decision-making.
- I provided practical recommendations to improve customer retention, increase revenue drivers.

Bank Marketing Campaign Analysis | SQL & Power BI | [github.com/winnerdonald158/Bank-MarketingCampaign-Analysis](https://github.com/winnerdonald158/Bank-Marketing-Campaign-Analysis)

- I evaluated marketing campaign effectiveness across 11,164 customer contacts, achieving exceptional 47.38% conversion rate

- I built interactive Power BI dashboard analyzing customer segmentation by job type, education, marital status, and financial behavior patterns
- I Identified management and blue-collar segments as top converters, and discovered customers without existing loans showed higher deposit adoption
- Technologies i used: Microsoft SQL Server, T-SQL,Power BI, DAX

TECHNICAL SKILLS

- **SQL:** PostgreSQL, SQL Server, MySQL
- **BI & Visualization:** Power BI, Apache Superset, Excel
- **Power BI:** DAX, Power Query, Data Modeling, KPI Development, Dashboard Design
- **Data Analysis:** Exploratory Data Analysis (EDA), Data Cleaning & Transformation, Data Validation, Trend & Pattern Analysis
- **Business Analytics:** Customer Churn Analysis, Customer Behavior Analysis, Customer Support Analytics, Customer Segmentation, Root Cause Analysis, KPI Analysis, Business Problem Solving
- **Analytics & Reporting:** Data Visualization, Data Storytelling, Business Reporting, Business Recommendations
- **Other:** GitHub, Microsoft Office

EDUCATION

Bachelor of Science in Medical Biochemistry

Jan 2018 - Feb 2023

- University Of Cross River State, Nigeria.

Best Brain International Academy,Bwari, Abuja, Nigeria

Jan 2010 - July 2017

ADDITIONAL INFORMATION

- **Languages:** English.
- **Certifications:** Power BI, Apache Superset
