SUMMARY

Winner is a Data Analyst with hands-on experience in analyzing health and patient data to uncover trends and support better decision-making. I'm skilled in Excel, SQL and data visualization, with the ability to translate complex health data into clear and actionable insights. I'm Passionate about using data to support early detection, prevention, and improvement of healthcare.

TECHNICAL SKILLS

- Health Data Analysis
- SQL (PostgreSQL, Microsoft SQL Server ,joins, aggregation, subqueries)
- Power BI (dashboards, DAX, data modeling, visualization)
- Apache Superset (data visualization & dashboard creation)
- Excel (data cleaning, pivot tables, formulas)
- Data Analysis & Reporting
- Exploratory Data Analysis (EDA)
- Data Cleaning & Transformation
- Statistical Thinking & Trends Analysis
- Data Storytelling & Presentation

PROJECTS

Cancer Risk & Prevention Analysis | PostgreSQL, | Power BI | github.com/winnerdonald158/Global Cancer Analysis

- I analyzed global cancer data to identify high-risk countries and regions
- I used Postgresql to evaluate cancer cases, deaths, and prevention coverage
- Then I built Power BI dashboard to track deaths prevented and coverage gaps
- I Identified regions with low healthcare coverage and high preventable deaths
- I also highlighted countries that needs urgent intervention based on risk levels
- I Provided insights to support better healthcare planning and resource allocation

Diabetes Risk Analysis Dashboard | Excel, PostgreSQL, Apache Superset |

github.com/winnerdonald158/Diabetes Risk Analysis Dashboard

- I cleaned and prepared patient health dataset using Excel
- Then I analyzed health indicators such as BMI, HbA1c, age, and gender using SQL
- Built interactive dashboard in Apache Superset to visualize diabetes patterns
- Identified high-risk groups based on BMI and age distribution
- Found strong relationship between HbA1c levels and diabetes status
- Provided insights to support early detection and prevention strategies

Digital Behavior & Mental Health Risk Analysis | PostgreSQL & Power BI | github.com/winnerdonald158/Digital Behavior & Mental Health Risk Analysis

github.com/winnerdonald158/Digital Behavior & Mental Health Risk Analysis

- I analyzed digital behavior data to understand how screen time, sleep, and app usage relate to mental health outcome
- I used PostgreSQL to explore the relationships between anxiety levels, sleep hours, screen time, and wellbeing scores
- I identified users that are at risk groups based on patterns like high screen time, low sleep, and high anxiety levels
- I built a Power BI dashboard to visualize trends in digital habits and mental wellbeing
- I examined how factors such as notifications and app switching affect focus and mood
- Delivered insights that support better digital habits and early mental health awareness

EDUCATION

Bachelor of Science in Medical Biochemistry

Jan 2018 - Feb 2023

- University Of Cross River State, Nigeria.

Best Brain International Academy,Bwari, Abuja, Nigeria

Jan 2010 - July 2017

ADDITIONAL INFORMATION

- **Languages:** English.
- **Certifications:** Power BI, Apache Superset
